| Professional Summary

I am an eager software engineering student that is aiming to get an internship/position as a software engineer. I am highly motivated to work and be a part of a team because of my expertise in the study and my drive to challenge myself. Outside my studies, I continuously work on sharpening my technical skills relating to software development by completing personal projects. I have the ability to work individually or as a resourceful team member, as demonstrated in my high distinction grades for ICT project management relating to agile and scrum iteration of a software's lifecycle. I am keen to work with a company that shares my motivation to improve and develop into my career.

| Employment History
